WASHINGTON, April 1.- The Taft administration is about to defend itself aggressively before the people of the United States. Convinced that the public mind has been impressed by attacks of various kinds upon the administration in many parts of the country and that the criticisans cannot be permitted to pass unanswered without mjury to republican prestige, the party leaders decided to "cary the war into the enemy's country." President Taft is now declared to be ready and anxious to as-

sume the offensive. The opening guns will be fired next Saturday in Washington by the president in person, and in Chicago by Attorney eGneral Wickersham. Mr. Taft will speak in this city on the subject or organization and he will be supported by other powerful orators of the republican party. Attorney General Wickersham's subject will be the policies of the administration. The speeches by the president in Washington, Senator Lodge, Representative McKinley of Illinois, chairman of the republican congressional committee; Representative Duncan McKinlay of Colifornia, John Hays Hammond, president of the National League of Republican clubs; John A.
